Jobs 1.9 Beta - Modules

NEWS_PDF_AUTHOR: jlm69

NEWS_PDF_DATE: 2005/8/4 6:12:17

I have released a new version. 1.9 Beta.

There are no changes to the database.

This release has:

1. group permissions - you can choose which groups can submit a listing.

2. Koivi Editor - You can now choose to use the Koivi Editor or the standard Xoops Editor.

3. You can now name the module anything you want before installation.

Next version will have some sort of resume's, still figuring out how I want to do it.
The next version won't be released for at least 1 month.

You must read the readme file first.

 It should really be a stable release but I made many changes to the code and I want to make sure I didn't forget anything.

Hope you all like it.

you can get it in the Module Dev Forge:

http://dev.xoops.org/modules/xfmod/project/?jobs
