Tropical mail is a port of Iloha Mail for Xoops. This is a webmail client, similar to squirrel mail but more feature packed. Using this module you can allow your users to view their email accounts. Some of it's features are:

- Imap (including folders) and pop3 support
- Multiple languages available for each user. This allows each of your registered user to view his/her email in their own native language.
- Bookmark manager
- Complete contact manager
- Calender
- Preferences set for each individual user.
- Spam protection

You can see it in action on my site by registering.

It can also be downloaded from my site at:
