We're pleased to announce the launch of [Avant News](#), a satirical news site featuring political, social, entertainment and technological commentary in the form of humorous news reports transmitted from plausible futures.

We're pretty pleased with the look, functionality and content of this Xoops-powered site so far, with a lot more to come, and hope you will be, too.

If you need a good laugh and a break from the bleak present, stop by and have a look at the bleaker future.
