This version was mainly created to support the new way Xoops 2.2 uses extended editors like Kiovi.

You can use it on a production website.

This version is compatible with Xoops 2.0.x AND Xoops 2.2.x

Changelog

> The module is now capable to use the editors provided with Xoops 2.2 (The module is also running with older Xoops versions)

> I have modified the templates so that the printable version, the pdf version and the rating pages are not indexed by robots (thanks to tl for the idea)
