[Jobs 1.9 is now stable](#). All the changes from the last version 1.84 are:

1. Added Group Permissions.
2. Removed config.php file.
3. You can now choose the Koivi Editor or not.
4. Fixed all errors that were reported during beta stage.
5. included the files and instructions for the Koivi Editor in the download.

Next Version will be 1.95 beta, It will have some way of doing resume's. Next version is still a while to come, at least one month, depends on my free time.

Hope you all enjoy.

John
