eXtCal is an event/calendar module developed exclusively for XOOPS, it is thus integrated perfectly there.

It integrates a fine management of the right user allowing thus a great flexibility in are use. You can view it in live on my web site: <u>Zoullou.net</u>.

This is an Release Candidate version, don't use on production site. Please report any bug you find by the <u>Bugs Tracker</u>.

Thanks to MarcoFr for his help.

eXtCal 2.0 for XOOPS 2.2.x eXtCal 2.0 for XOOPS 2.0.13.1

I hope you will like this module

Cheers
