phpRPC - XMLRPC for your CMS? - XOOPS

NEWS_PDF_AUTHOR: Anonymous

NEWS_PDF_DATE: 2002/5/18 2:27:39

phpRPC is meant to be an easy to use xmlrpc library. Function syntax, and plugging into most weblogs (xoops, nuke, pn, etc) is greatly simplified with the use of database/rpc-protocol abstraction. It should run on any php server with most datbases.

If your a module dev or just wanna check it out, then you can do so here: http://sourceforge.net/projects/phprpc

Cheers, Half
