

[Gifts.Meant4u.com](#) ... a new 2.2.2 xoops site is online - YAXS

NEWS\_PDF\_AUTHOR: tzvook

NEWS\_PDF\_DATE: 2005/9/8 12:38:32

[Gifts.Meant4u.com](#) is a complete, one stop gifts directory: hundreds of categories to find your way when going to choose the gift of your choice or to promote your gifts related website.

The site is heavily based on (a slightly modified version) the great Weblinks module by Kenichi OHWADA (<http://linux.ohwada.jp/>).

Since the site is meant to be an online directory most of the used modules are "internal" ( xmmemberstats , Formulaire , profile etc' ... )

CBB will be open soon as a "gift forum" with the oportunity to promote and talk about Gifts related websites & topics.

Xoops users that own a gift / shopping related website are welcome to add their site (for free) to the directory.

I must say that xoops 2.2.2 is a great progress after so many years and versions of xoops I used.

This community and especially the DEV team is something to be proud of for every xoops user.

Comments about the site are welcome...
