An adapt is in test on my site.
It is about a module allowing to have a list icq, inside one can found:
The uin if offline or online
The mail
The site if there is!
The city
The astrological sign and the small presentation of the registered and messenger's possiblité a message directly here if to possess him(it) to you! The module is extrèment bugué then I count on you for me brought back(reported) bugs!! Thank you in advance

You can see him in action Here http://www.inconnueteam.net/modules/Listicq/ excuse for my english but i am french *Editors Note:* Looks like another good moduel to me.
