Friends,

Here is my new affiliate shopping site running on xoops 2.0.13.1. I choose to use 2.0.13.1 instead of 2.2.x because of stability issues.

This site includes lot of customization (xoops core) for achieving SEO urls for most of the site, well still needs improvement in some places

Please leave your comments and suggestions on theme and look..

Site URL : <http://www.deals2find.com/>

Thanks  
Just4Fun
