Greetings all.

We have just completed a new XOOPS site here in Australia.

[Massage therapy portal](#) is a site for massage therapists to place listings of the clinic and specialities and for the public to search for a clinic suitable for their needs. Using XOOPS instead of other CMS systems has been a dream. In particular the mx-directory module which is at the core of the site. All are welcome to comment.. having recently placed this on a high level server it may take a day or so for the name to have propagated to all countries.
