Aloha,

The website [Ron's ROV Links](http://ronsrovlinks.nl) is a portal site for the underwater Remotely Operated Vehicle (ROV) industry and associated industries.

So far the website contains over 1200 links to manufacturers, institutes, universities, etc.

Recently the site has been upgraded from a static html-site to a Xoops-site.

Some of the modules used are WF-Links, ExtCal and XHLD.

Kind regards,

McDonald
