I have replaced my old [Electric Skillet](#) website with a modified XOOPS install. I am still adding all the content but there are many wallpapers and more already available. The 436 avatars I am using will be made available for download in the next few days for those interested. Along with a few original and converted themes.

If anyone is interested in separate graphics packs please let me know. I am speaking in terms of groups of images for the Downloads, Web Links, etc. Made to match the various looks of themes. You can see examples on the site of what I mean. . .
