

B-Global Theme - Themes

NEWS_PDF_AUTHOR: JMorris

NEWS_PDF_DATE: 2005/11/13 7:14:52

The B-Global theme is a clean, dark blue theme that uses a fixed-position 3D globe as the page background.

There are two versions of this theme included with this package. The first version is called B-Global and is intended for standards compliant web browsers. The second version is called B-Global-IE and is indented for Internet Explorer.

The primary difference between the two themes is the body background image and the blockContent background. The IE version has a slightly faded version of the 3D globe and no background image applied to the blockContent class. This is to prevent page "jerkiness" when scrolling. IE is the only browser tested that has this problem.

Features:

=====

Compatible XOOPS 2.2.x ONLY!

Both front-end and backend themes included

W3C XHTML 1.0 Transitional compliant

W3C CSS 2.0 compliant

Minor SEO adjustments

Comments:

=====

This theme is released for free in an "as-is" state under the GNU/GPL License and may be used for any purpose you so choose. A link back to MyWebResource is not mandatory, but it is greatly appreciated. A version of this theme for XOOPS 2.0.x will be available soon.
