After week of hard, but useful and productive work with designer [Demiurge Ash](#) (hey, he is really Demiurge) I'm very proud to present new site of [Artesian archaeological expedition](#). Yes, it's still old good XOOPS, but it allowed me to implement flexible, uncommon design, created without the caution to the possible limitations from CMS-side. Mostly based on intensive usage of TinyD (which, which bundled SPAW-editor, solved most problems of maintaining site for non-technically oriented customer), site is live now, but, as any Art, it's permanent beta in the evolution.

Sorry, content is (except photos) in Russian only, but I hope, you'll like look of site
