There has been a lot of talk with Xoops users about how to use Xoops and Podcasting side by side. I was one of the puzzled ones for many months, so let it be known that Xoops can do anything you want if you work at it long enough.

http://www.podbaby.net

This is (as far as I can find) the first Xoops site to be used as a podcast directory that actually displays the feeds right into xoops useing a really modified links module and multi-menu.

So yes Xoops can do anything you want it to do, just incase you were still not sure of this project.
