

xcGallery 2.0.2 released - Modules

NEWS_PDF_AUTHOR: mcleines

NEWS_PDF_DATE: 2005/12/20 10:10:00

Xcgal 2.0.1 was a little buggy, so xcgald 2.0.2 is released as a kind of bugfix version.

But I'm proud to add a very usefull feature for this release: watermarking. Watermarking can be turned on in module configuration. A default watermark file is stored in `modules/xcgal/images/watermark_default.png`. For an own watermark simply save your `watermark.png` into that folder. Requirements to use this feature are jpg pictures and GD support.

Can be downloaded at:

http://dev.xoops.org/modules/xfmod/project/showfiles.php?group_id=1264

Two new language constants:

in `xcgal/language/english/modinfo.php`

`_MI_WATERMARKING`

`_MI_WATERMARK_TEXTDESC`

And Merry Christmas

mcleines

Changelog

#####

v2.0.2

- Watermarking feature for jpg pictures (Mcleines)
- Bug #3289 No redirect after batch upload - exit at the fourth picture (Reintjan)
- Bug #3203 - Correction of `db_input.php` (DMarvelus)
