Community Bulletin Board Module for Xoops 2.0*

Changelog 1.16

=====

1 DB query optimization and speed enhancement

Note: This release is solely for query optimization, no new feature introduced. Due to time limit, the optimization is far to complete and only a very few straightforward (critical) issue are fixed. More work is expected in a new CBB (based on practice with CBB 2.3*) coming with Xoops 2.3
