Dear Xoopers,

We have launched [Manual Directory Submission Services](#) website at [Seoster.com](#)

We have used Xoops 2.2.3 for developing this website and have customized the default theme. We have also changed the Xoops main "modules" folder to "seo", "wflinks" to "listings" and newbb to "forums"

I hope that this is valid as per GPL licences, so please take some time and visit our website and review our services.

We are also offering [Free Directory Submissions](#) to first 50 members who will register and post 5 good topics on our forums.

Waiting for your comments and reviews.

Thanks,

Tony
