

xAsset - version 0.85 released - Modules

NEWS_PDF_AUTHOR: McNaz

NEWS_PDF_DATE: 2006/1/2 16:40:00

Panther Software Publishing is pleased to announce the release of xAsset 0.85.

Xasset is a Xoops module geared towards secure digital distribution, such as licensed software, mp3 files, documents etc. XAsset provides a mechanism where admins can configure there applications (or media) and issue licenses against there. Clients can then view these licenses and download licensed files.

Changes in 0.85

- [size=x-small]1. Better mime type handling by using class/mimetypes.inc.php when downloading files.
2. If user has an older order with status "In Cart" then it would be lost if a later order was completed.
3. Added membership expiry support.
4. Updated help file and PDF on new features.
5. Cosmetic changes.
6. Please note that a new table has been added an some table structures have been made. Please click the "Check Tables" link after the update.[/size]

I would like to take this opportunity to wish everyone at Xoops a happy New Year. McNaz
