This is my second attempt at a XOOPS website. [The Ogden Biz Net](#) is a community website for a city in Utah, USA. My original vision was to form a business type club for business owners. What I think it is turning into is a community website. Hopefully the residents of Ogden will contribute to the site with articles and other useful content.

As a newcomer to XOOPS webdesign, I'd like to see what XOOPS members think and give me some feedback to improve the site. I'm still in the process of moding the look and feel of the site.
