Shotokansite Goes XOOPS - YAXS

NEWS_PDF_AUTHOR: supernix

NEWS_PDF_DATE: 2006/1/21 10:36:15

Finaly after over a year of running Dragonfly CMS I was able to switch to XOOPS after seeing the xcGallery module released and testing it on the server and seeing how great it was.
I had originally passed over XOOPS reluctantly due to the lack of a good gallery module.
I had finally made the choice to shake things up at the site due to the fact that XOOPS really does have a better community with many more modules and more mature CMS code.
Not to mention great document management systems. And many of the modules I use thankfully have WYSIWYG and people really love that and GIJOE thanks to his great programming with the AutoLogin code everything is great.

I am currently using the latest:
xcGallery
Smartsection
Xcal
CBB
Weblinks
DocuWiki
Xpress

Thanks to everyone for the fine coding
Steve,
