[MJEOL.COM](http://mjeol.com) is using the Xoops CMS.

MJEOL is a content rich, dual website devoted to factual, accurate and up-to-date info about Michael Jackson along with political and social commentary concerning current public events.

I've tried many, many cms and blog software, and Xoops is definitely the best, most customizable and well put together CMSs ever created. You can wrap almost anything around xoops!

Some of the modules/hacks used:

Spotlight

Multi-theme

Include statements for individual html pages
