Hi All,

XOOPs ROCKS! The improvements are amazing, it is a great content management engine.

I had the opportunity to put up another XOOPs site for my church Emmanuel Lutheran Church of Longview at

<http://www.elclongview.org>

It is built on XOOPs 2.2.3.a and a modified version of the imago06 theme.

The main module used for the information pages is wfchannel. I like the flexibility of this module. It allows administrators to edit the content inline, and gives a place for those things that just don't seem to fit into any other module.

Thanks to the XOOPs crew for making all of our lives a little easier!
