Our WDC_003 is very different in the color and the style of the boxes to other themes. It is based on freeware graphics from http://www.Templatemonster.com and easy to customize. If you want, we can add a Java navigation to this theme.

This theme is working with Xoops 2.0.x and higher.

You can see this theme at our new demosite:
WebdesignCustoms Demosite

Go to the theme box and take a look at our new freeware themes.

Have fun
