Our WDC_003 is very different in the color and the style of the boxes to other themes. It is based on freeware graphics from www.Templatemonster.com and easy to customize.
If you want, we can add a Java navigation to this theme.

This theme is working with Xoops 2.0.x and higher.

You can see this theme at our new demosite:
WebdesignCustoms Demosite

Go to the theme box and take a look at our new freeware themes.

Have fun
