

IMDb PHP Class 0.4 (XOOPS Module) Just Released ! - Modules

NEWS\_PDF\_AUTHOR: Genius

NEWS\_PDF\_DATE: 2002/6/7 2:19:51

I'm glad to inform you all that IMDb PHP Class v0.4 as just been released ! Check it out !

- [IPC Project website](#)
- [RC 3.0 Module imdb\\_php\\_xoops-rc3-0.4.tar.gz](#)
- [RC 2.0 Module imdb\\_php\\_xoops-rc2-0.4.tar.gz](#)

**New features :**

Added ability to follow HTTP redirects, "More Results" on the multiple matches page and a different method to get files from internet where added too. SQL abstraction has been implemented in order to have one single API file to modify/distribute for all supported applications : PHPNuke, XOOPS or Standalone so far. You'll now have the possibility to record Cast and Directors to database. Added Auto update cast and directors for movies already in database. Added Language file support. Modified "Tagline" and "Outline" RegExp patterns for more accuracy.

Feedback is gladly welcome on our [support forums!](#)
