Xoops.net, the home of **Business Systems for Xoops**, and support home for the XBS series of modules (CDM, SACC, EUVAT etc) is open for business. Xoops.net is focusing on business oriented developments for Xoops and striving to become the portal for business usage of Xoops.

If you are developing business mods and themes or have products that compliment the Xoops CMS, then Xoops.net could be your home too.

Hope it helps
