I'm working in new XK_Editor version with great expectatives.

I'm developing new options like:

- Admin panel to select XK_Editor options by group.
- Multimedia files Dialog.
- Comp with Opera 9.
- Bugs solving.

And the hottest feature, work directly with xoopsCodes. If you don't want to allow your users to send HTML code you can activate this option.

Users will edit the code in wysiwyg mode, and cleaned and well formed xoops bbcodes will be obtained.

This is what you see:

This is what you obtain:

By now, this release is not available for download, but you can test the new xoopsCodes mode in test site:
