I'm proud to announce the release of LDAP Authentication hack for XOOPS 2.0*, 2.2*.

Download

[Xoops Authentication Hack](#)

New features

- Automatic Xoops Account provisioning. If the authentication is ok, the system synchronise automatically account infos from LDAP to XOOPS Database with XOOPS Group assignation

- Additional Custom LDAP Filter

- Code refactor

Test on XOOPS 2.0.13.2 and XOOPS 2.2.3 with OpenLDAP 2.2 and Windows 2003 Server

Installation

See readme file

Important

This is the last release for Xoops2.2* series to follow the XOOPS Team recommendation. This hack will be include in the 2.3 Core with additional features.
