

CSS theme xf_colourRed - Themes

NEWS_PDF_AUTHOR: studioC

NEWS_PDF_DATE: 2006/3/12 2:26:33

xf_colourRed is packed and released for download today. I was asked to release this as a download, so here it is. It is a workout on stylesheets of the xf_colourBlue theme. What is more fun than usable is the animated background. Did you ever tried to use animated background-gifs on your sites within stylesheet and background: url(...)? Not all UA support this though. Follow [this link](#) for more information and download.

Have a look at the [DEMO page](#) when you want to see it in action.
