Hi all,

iCenter theme designed by <http://www.alburak.net> has been released! 😊

It's based on CSS template (<http://www.solucija.com>).

There are marquee in header display what you put in intro.html , and two links for adding your site to favorites ans set as homepage.

, , and inserted in theme.html so you need to set up it from admin panel > General Settings and Meta Tags and Footer .

Using cblocks and crblocks not recommened.
