

LDAP Library v0.5-beta1 released - Modules

NEWS\_PDF\_AUTHOR: jesore

NEWS\_PDF\_DATE: 2006/4/5 16:24:52

This is the first release of LibLDAP, an attempt to integrate LDAP into XOOPS. The module is for developers only and provides the common interfaces for XOOPS-DB-interaction (XoopsObjectHandler) to a LDAP-repository.

A special feature is the meta-handler (MixedObjectHandler) that can have more than one real object handler and syncs the data in all backends.

Maybe this is of use to someone.
