

[Xoops Showcase-- ProcessTeam.org - YAXS](#)

NEWS_PDF_AUTHOR: rabideau

NEWS_PDF_DATE: 2006/4/9 2:34:29

I am pleased to announce the grand opening of ProcessTeam.org. The concept of this site is predicated on a concept forwarded by Mithrandir awhile ago, Thank You, Mith!

The Process Team site is intended to provide a showcase for Xoops and Xoops modules which support the implementation and development of mature engineering business practices and processes. The modules I have showcased include:

dms
jobs
smartpartner
xhelp
icontent
wordpress
xflow
bm-survey
xhld
wf-downloads
wiwimod
wikipedia
xdonations
multimenu
sitemap
and more.

All of these modules are integrated into a cohesive environment focused on the business area I work during "my day job" --Engineering Process Improvement. As part of showcasing the Xoops modules, I provide over 200MB of six sigma, CMMI, ISO 9001 and other process related tools and documentation (gratis). I have also, based upon a discussion thread on this site, created a place where Xoops developers and Xoops customers can meet and establish a working relationship (the Jobs module facilitates this function).

Please visit the site and let know what you think. If you have modules that you would like to see showcased on this site, please contact me, the site webmaster (link on the bottom of every page). I am happy to work with you to try and provide visibility to your efforts.
