

[xf\\_greenGrass - Themes](#)

NEWS\_PDF\_AUTHOR: studioC

NEWS\_PDF\_DATE: 2006/4/17 16:01:56

xf\_greenGrass is released today! It is a 2 column Layout with the main content coming first in source. The photo used in this theme was made by myself and you could use it without restrictions when you want.

The theme is able to display modules you want like forum eg. without any sideblock by settings in blockadministration of our preferred content management system. It's clean, fast and simple and of course, valid W3C and CSS tested.

Read more and download on [xoopsfactory](#)

For the first time a static XHTML version is available too. I hope it will make it easier to use it.

Happy XOOPSING!  
Michael
