CSS theme xf_YelloW_C - Themes

NEWS_PDF_AUTHOR: studioC

NEWS_PDF_DATE: 2006/4/21 19:39:46

You should be a fan of colour Yellow to like this theme, but it is easy to modify this theme and change colours when you have some skills in editing css files and changing images to different colours, though. It is valid [x]HTML transitional and CSS.

Credits and thanks go to solardreamstudios.com for using the idea of the horizontal menu and to openclipart.org for using some images i found there.

A static version of [x]html files is also available for download which will perhaps be interesting for some.
