Calling for help from local developers - XOOPS

NEWS_PDF_AUTHOR: phppp

NEWS_PDF_DATE: 2006/4/22 1:14:00

The Xoops Localization Framework is to be designed and implemented in Xoops 2.3
We need help from local developers who have experiences or corresponding knowledge in (not limited):

1 local language charset encoding/converstion handling
2 multilanguage content management
3 database language and charset configuration as well full-text search related issues
4 any issue you think should be addressed

If you have the willness or recommendation, plz contact skalpa or phppp.
Comments/discussion are welcome, and of coz necessary.
