## Gallery package for RC3 & HowTo - Modules

Posted by: MaxIT

Posted on: : 2002/6/24 1:21:53

To minimize troubleshooting in patching and configuring [Gallery](#) to integrate it as a XOOPS RC3 module, I've created ready-to-install packages including Gallery v1.3, RC3 Onokazu's patch, NetPBM for different OS, a little patch, and a simple HowTo with all informations needed to make Gallery work on most hosting plans, also if you have not root control on the server.

you can download packages here:

[Gallery XOOPS RC3 Package version 1.3 - FreeBSD Hosting](#)

[Gallery XOOPS RC3 Package version 1.3 - RedHat Hosting](#)

[Gallery XOOPS RC3 Package version 1.3 - Unix Solaris Hosting](#)
