

RMSOFT Gallery System 2.0 - Modules

NEWS_PDF_AUTHOR: bitcero

NEWS_PDF_DATE: 2006/4/29 18:47:18

The final version of [RMSOFT Gallery System 2.0](#) is already available to download in WWW.XOOPS-MEXICO.NET.

RMSOFT Gallery System 2.0 is an advanced system for images galleries management. Allows many users to publish and manage images, and to do searches. Has several characteristics that offers great functionality to make of your Xoops site a total images center.

This release correct all the reported problems in the Beta versions and add new characteristics and functionalities to the module.

Now all blocks has a multicolumn option, In addition the capacity to specify different images format to download from the module was added. This is useful for instance when it is about wallpapers which its full size can not be showed directly in the page.
