AnimalPedigree.com is a new service on the internet for animal breeders and enthusiasts who want to create an online pedigree database.

The pedigree application is a custom made Xoops module originated from the [Dutch Dobermann Association](#) pedigree database.

It's flexibility allows users to create a pedigree database for any animal. Users can create extra fields, lookups and define custom colors.

AnimalPedigree.com runs on Xoops 2.013.2 with Multimenu, TinyContent and Liaise.

Subscribers get a subdomain with only the AnimalPedigree module running on Xoops.
