Dudes hope u like my new revamped website i have made some modifications to the base theme from astonthemes.com . I want to tell everybody that XOOPS is the best CMS i ever used and will be its supporter till i leave. I tried many CMS but this CMS is kick a\$\$\$. Others where kinda crap, i may have tried 10 to 20 CMS before i stumbled upon Xoops. I LOVE IT. Plus the community is quite helpfull any question is answered in a day maybe less.

My site is all about tech, hardware, software mobiles, gaming, open source and all other nerdy stuff (like the slashdot website).

This is the link <http://thinktechno.com/> hope u like them 🍷
