

Gabbly as a Module Released! - Modules

NEWS_PDF_AUTHOR: wizanda

NEWS_PDF_DATE: 2006/5/20 14:41:09

What is Gabbly?

Gabbly is one of these new systems that allows you to chat in almost any browsers with a chat block plug-in, this I have taken and included as a Xoops module.

This means you can take a team of people from your site and send them to other sites to discuss it.

The FAQ's are included, yet you can find all info on Gabbly.com

There is a [Demo Here](#)

And you can [Download It Here](#) as module.

There are no admin controls and it is only an Iframe of what is store on Gabbly.
