Release of article 0.95 - Modules

NEWS_PDF_AUTHOR: phppp

NEWS_PDF_DATE: 2006/6/18 1:00:21

The "Article" module is an advanced content management module for Xoops 2.0*, 2.2* and 2.30, with
features:
 * multi-category: one article could belong to multiple categories
 * multi-page: one article could have multiple pages, each with its own subtitle, with navigation
 * multi-template per module/category/topic/article: the module could have different template upon different usage; a category could have different templates for different layout or different management of article links; an article could have different templates for layout and behavior
 * keywords/tags management: as an experiment for XOOPS tag system, the "article" enables keywords/tags management and presentation
 * easy to clone: you can install as many as possible copies of the module with any desired dirname by setting a few parameters
 * SEO URL rewrite: according to your server/apache support, use rewrited search engine friendly URL
 * div+css tempalted: although it needs more tune, the article templates are completely div/css based
 * and most important, completely XOOPS based
