DokuWiki is a standards compliant, simple to use Wiki, mainly aimed at creating documentation of any kind. It is targeted at developer teams, workgroups and small companies. It has a simple but powerful syntax which makes sure the datafiles remain readable outside the Wiki and eases the creation of structured texts.

The DokuWiki For XOOPS 2.0 is based on the dokuwiki release of March 9th, 2006 with search enhancement, which is now compatible with XOOPS side wide search.
