

iSearch version 1.5 - Modules

NEWS_PDF_AUTHOR: hervet

NEWS_PDF_DATE: 2006/7/1 6:27:20

[A new version](#) of the Xoops module [iSearch](#), was just released.

With this Xoops module, you can know what searches are made with Xoops.
You can restrict what the module record to some groups.

Changelog :

- Some bugs were corrected in the module's administration
- Possibility, still in the administration, to directly remove by IP from the keywords list

[You can download the module here.](#)

[In case of problems, or to suggest new features, you can use this forum.](#)
