

Marquee 2 Beta 1 - Modules

NEWS_PDF_AUTHOR: hervet

NEWS_PDF_DATE: 2006/7/1 8:09:29

Marquee is a Xoops module wich enable you to have blocks containing information on the form of scrolling text.

Texts can scroll from right to left and from top to bottom.

This new version, whose code was completly rewritten, brings many new features.

New features

- The code was completly rewritten
- Possibility to display dynamic content from other Xoops modules
- Possibility to display rich text (with the help of the kiovi editor)
- Possibility to choose between the marquee html tag (from Microsoft) and a display produced by javascript
- On the fly blocks so that you can use as many blocks as you want
- Fully comptatible with Mysql 5

Download

[You can find the module here in french, english, german, spanish and tchinese](#)

Installation

- If you are installing the module without using a previous version, install it as any other Xoops module
- If you were using a previous version, upload all the files to your site (and overwrite the existing files)

then update the module from the Xoops modules manager.

Warning, the database fields were renamed, you must go in the module's administration as least one time

to update the database fields.

Forum

[Use this forum to discuss and report bugs about the module](#)

Beta version

Even if the module is in beta version, I think it is relatively stable

Happy Xooping,
Hervé
