

Alumni and Jobs vulnerability Fixed - Modules

NEWS_PDF_AUTHOR: jlm69

NEWS_PDF_DATE: 2006/7/4 16:46:30

There is a reported vulnerability in the Myads module. Both the Alumni and the Jobs modules were originally created from the myads module. Both modules also have this vulnerability, all versions. However I have fixed both modules according to zyspec's fix in [This Xoops Forum](#) you can either apply his fix manually or you can update the modules with the new versions [Jobs 2.4](#) and [Alumni 2.2](#) but they MUST be fixed.

Thank You,

John
