Hi,

I would just like to tell you all that the website of Kuniba kai Sweden has been successfully converted to XOOPS. The modules used are:

- \* Content (multiple instances)
- \* news
- \* Sitemap
- \* xcgai
- \* myalbum (for random images on the frontpage)
- \* three instances of TinyD
- \* xfguestbook
- \* newbb
- \* laise
- \* multimenu
- \* isearch
- \* waiting
- \* xhld
- \* piCal
- \* protector
- \* tellafriend
- \* xLanguage
- and wflinks.

It is a xoops 2.2.4 site with the hack to place blocks below the contents of the page.

Enjoy!
