Hi,

I would just like to tell you all that the website of Kuniba kai Sweden has been successfully converted to XOOPS. The modules used are:

- * Content (multiple instances)
- * news
- * Sitemap
- * xcgai
- * myalbum (for random images on the frontpage)
- * three instances of TinyD
- * xfguestbook
- * newbb
- * laise
- * multimenu
- * isearch
- * waiting
- * xhld
- * piCal
- * protector
- * tellafriend
- * xLanguage
- and wflinks.

It is a xoops 2.2.4 site with the hack to place blocks below the contents of the page.

Enjoy!
