

Xdef theme for Xoops 2.0.14 - Themes

NEWS_PDF_AUTHOR: martyboy

NEWS_PDF_DATE: 2006/7/20 1:57:47

I have modified the default theme for xoops 2.0.14 basically just the CSS, this is my first attempt at a xoops theme. Xdef is a white and light grey theme.

As I am a complete novice at CSS and theme design there may be something wrong with the CSS I have not noticed please forgive me if there is, it's looking good so far though. Hopefully someone will like it, its about time I gave something back to the xoops community so hopefully someone will have use for it.

You can see a live demo [HERE](#)

and you can download the theme [HERE](#)

Cheers
